

Computers Donated by Holcim Corp. Of Florence, Colorado

Holcim of Florence Colorado Donated 9 computers for use in our computer lab. We used our existing monitors and mice to create 9 upgraded stations in our lab. We had old 486 and 386 computers before the upgrades were provided

The students make a beeline for the faster computers every time the classes come to the lab. These 9 computers are referred to as the “Holcim side” of the lab.

The HP 4Si printer donated by Holcim is better than most of the printers we have at Cañon City High School.

Thank you Holcim and Bob Hofmann for helping our school.
